The International Design Group deals with all aspects of the design, development and consultancy of purpose built residential, commercial and sports communities. Our broad array of interconnected disciplines creates a single point of design responsibility which eliminates the inevitable coordination issues between the constituent teams. Cutting edge design, exceptional service and complete dependability are all part of our mission statement.

Landscape Design is essential when creating the unique sense of place for generations to use and enjoy. Landscape International brings the design intent of the other disciplines into the open space, using a variety of materials and colour palettes which evolve through the seasons and the years. Landscape International creates landscaped spaces which enhance and complement the built development by collaborating with other disciplines within the group or other designers worldwide.
How We Think

Landscape International has a wide range of experience from inspiring world class destinations to the more utilitarian commercial spaces. Whilst we respond to the inherent qualities of the chosen site, our primary focus is to address the clients requirements, understanding that value creation is key to any development.

Landscape International specialises in designing the landscape elements of large scale developments and resorts on a worldwide scale. This comprises design work from inception through local authority and public consultations, planning strategies, detailed design and to the construction and completion.

What We Do

Landscape International is proud to provide domestic and international commercial Landscape Architectural services.

Our services include:

• Concept Design & Feasibility
• Landscape Masterplanning
• Landscape and Visual Impact Assessments
• Qualitative and Quantitative information
• Landscape Management Plans
• Detailed Design & Tender Packages
• Landscape Consultancy
• Visiting Inspection

We provide a delicate profession in a robust and commercial way, to optimise the potential for the developer and the end user.

“Creating a unique sense of place”

Whether internal or external spaces, good landscape design reinforces the relationship between the populace & the built environment. Landscape International creates inspirational and unforgettable environments from the smallest to the largest sites.
